Will Haul All Relief Supplies Free to San Fran-

EXCURSIONS NEXT SUNDAY

Pan-American Railway Will Cost Two Hundred Millions of Dollars.

Captain, Westbury, division passenger agent of the Southern Railway, received the following telegram on yesterday re-garding the San Francisco situation:
"Mr. Culp advises Mr. Hardwick to-day that Southern Rallway will handle free relief supplies when consigned to nuthorized parties at San Francisco and wightity.

"W. H. TATLOE."

The Sunday seaside excursions of the Chesapeake and Ohio, Norfolk and West-prn and Southern will be inaugurated

Only one railroad, the Pennsylvania, has gone into the planting of quick-growing trees on a large scale to provide for future timber supply. Other roads have tried it, but without any encourseing success. In 1892 the Pennsylvania planted 14,000 yellow locust trees on the company's property; in 1903, 43,000 trees; in 1904, 224,000; in 1905, 197,000, and this year about 80,000 will be planted. The Michigan Central has planted 80,000 catalpatrees on 123 acres of company property, but so far the results have been indifferent, and it is doubtful if good results will ever be obtained from the plantings. The Hilmols Central has planted two large groves of catalpa speciosa, one at Du Quoin, Ill., and the other at Harahan, La. The Norfolk and Western made a similar experiment with a grove of six acres at Ivor, Va., but it has since been found that lobioly pine has a more natural growth in that country, and large tracts of the company's lands have been set aside until the lobioly pine has attained a sufficient growth to cut for thes. On the Northern Pacific the ques-Only one railroad, the Pennsylvania, has attained a sufficient growth to cut for ties. On the Northern Pacific the ques-tion is under consideration of planting on company property and encouraging farmers along the line to plant.

The project of the Pan-American Railway is dramatic in conception. The enterprise will rank high among the great railways of the future. It involves the co-operation of fifteen republics. They will make for the peace of the Western Hemisphere, these 5,000 miles of rail links, which will cost \$200,000,000, and will bring New York into direct communication with Buenos Ayres or Alaska and Hudson Bay with Patagonia.

Ed. Crouch Charged With Setting Fire to His Father-in-Law's House.

CAUGHT WHILE RUNNING AWAY

Put Pile of Shavings Under Stairway and Saturated Them With Oil.

(Special to The Times-Dispatch.)
WEST POINT, VA., April 21.—Ed. crouch, a young white man, attempted to burn up his wife and father-in-law's family between 10:30 and 11 o'clock last light. Mr. Morris, who lived next door, in the home of Mrs. Pillsbury, an in1 valid, who has been confined to her bed nearly a year, before closing the house for the night walked out on the street with a guest who had called. They smelt moke and commented on it, and search is in ed around for it. While walking a little way down the street Mr. Morris met Mr. Crouch and remarked to him that he smelt fire. Mr. Crouch said, "I guess it is nothing," and hastened down-town. Mr. Everett Guthrie, who had been visiting, was returning home. First, he saw the fire. He woke up the people in the burning house and ran to give the fire all of West Point out. It was found that someone had piled shavings and dry wood from the veneer packings factory ed around for it. While walking a little that someone had piled snavings and dry wood from the veneer package factory and saturated it with kerosine oil and lighted it right under the house, under the stair-steps leading to the second story. Later in the night the steps would have burned, leaving the people

Thochus, the old wives say
That on Easter Day,
To the musick o' the spheres you do
caper:
If the fact, sir, be true,
Pray let's the cause know
When you have any room on your paper.

The old wives get merry
With spiced ale and sherry,
On Easter, which makes them remance;
And whilst on a rout,
Their brains whirl about,
They fancy I caper and dance,

Everyone labors except our distinguished progenitor,
He reposes in a recumbent position within our residence during the day,
His pedal extremities idling upon the bronze of the steam radiator,
Serenely engaged in extracting nebulous atmosphere from tobacco receptacle of mundane matter.

And in this connection I should include filial Ann.

Indeed, everybody is engaged in some variety of occupation in our domestic habitat—

Excluding, as primarily suggested, our distinguished progenitor.
